Date Published: 8/28/25

ASSIST does not take the place of a counselor on your campus. It is intended to help students and counselors work together to establish an appropriate path toward transferring from a public California community college to a California university.

Major Articulation Agreement

Electromechanical Systems Engineering Technology, B.S.

Effective during the **2025-2026** academic year

To: California Polytechnic University, Pomona
2025-2026 General Catalog, Semester

From: Cerritos College
2025-2026 General Catalog, Semester

TRANSFER AND ADMISSION REQUIREMENTS

CPP Eligibility

Transfers must meet the minimum California State University eligibility requirements listed below as the first step in being considered for admission. In addition to these requirements, Cal Poly Pomona (CPP) has implemented a multifactor admissions (MFA) evaluation process to evaluate transfer applicants. Fall applicants must have requirements completed by the end of the Spring term and Spring applicants must have requirements completed by the end of the Summer term.

Please note, the following requirements and preferred coursework are effective starting the 2023-2024 academic year.

CSU Minimum Admission Requirements

Cal Poly Pomona requires all transfers to complete the following:

- Be in good academic standing at the last institutions attended
- Have a minimum 2.00 GPA in transferable coursework
- Have a minimum of 60 transferable semester (90 quarter) units
    - 30 (45 quarter) of the 60 semester units must be in General Education
    - Completion of the "Golden Four"

Impacted majors may have required coursework that must completed with a "C" or higher.

Fall applicants must have requirements completed by the end of the **Spring** term and Spring applicants must have requirements completed by the end of the **Summer** term.

Please note, Cal Poly Pomona does not accept applicants who are seeking a 2nd Bachelor's degree. We encourage applicants to consider a Graduate degree.

Non-local Applicants

All applicants must meet CSU minimum requirements to be reviewed for admission. Non-local applicants applying to high demand and impacted majors will be held to a higher admission standard as CPP admits applicants based on space available in each major and therefore, should maintain a high GPA and complete all required, recommended and/or preferred coursework.

Please note, an applicant is considered local if the majority of their units come from one of our local area schools or if their AD-T is being awarded by one of our local schools.

Golden Four

1A: English Composition
An English composition course that emphasizes essay writing or reading and writing concurrently. Must be completed with a "C-" or higher.

1B: Critical Thinking and Composition
A second semester composition or writing course, or a course in reasoning and effective argumentative writing. Must be completed with a "C-" or higher.

- **[All Engineering majors are exempt from completing Critical Thinking as a part of the admission requirements. The Critical Thinking and Composition GE 1B requirement is completed through a series of upper- and lower-division design courses within the major requirements.]**

1C: Oral Communication
A basic public speaking course or other communication course. Must be completed with a "C-" or higher.

2: Mathematical Concepts and Quantitative Reasoning
A mathematics course above the intermediate algebra level. Must be completed with a "C-" or higher.

Multi-factor Admission Model

Cal Poly Pomona's MFA model for transfer applicants is made up of academic and non-academic factors with a majority of the weight coming from academic criteria.

To be considered for admissions to Cal Poly Pomona, all applicants must meet the minimum CSU eligibility requirements. Once an applicant's CSU eligibility has been determined, they will then be assessed based on a combination of GPA in all transferable coursework and additional Cal Poly Pomona selection criteria that creates and CPP Eligibility Index for each applicant.

Additional Criteria
The following Cal Poly Pomona selection criteria is taken into admission consideration:

- Academic grade point average in all transferable coursework.
- Priority to students from our local area.
- Your experiences and special circumstances such as military status, first generation to attend college, work experience, foster youth, extra-curricular activities, leadership positions, work related to major and approved campus partnerships.
- Completion of preferred, recommended, or required coursework with a "C" or higher

Please note, while local applicants will have an eligibility index, they will be admissible to a non-impacted program if they meet all of the minimum CSU requirements.

GENERAL EDUCATION REQUIREMENTS

Transfer students may satisfy General Education requirements by completing the California General Education Transfer Curriculum (Cal-GETC), or by completing an Associate Degree for Transfer (AA-T/AS-T).

Transfer students are advised to take courses required for their major as part General Education, as specified by each major, to achieve the minimum units to degree.

Major courses and campus-wide required courses that are approved for GE credit shall also fulfill (double count for) the GE requirement. [EO 1100]

For more information regarding Associate Degree for Transfer, please see your California community college counselor or visit: www.adegreewithaguarantee.com/

MAJOR REQUIRED

1 Select A or B

A

CHM 1150	General Chemistry for Engineers	3.00	No Course Articulated

B

Acceptable substitute Lab is not required CHM 1210	General Chemistry I	3.00	CHEM 111 General Chemistry 5.00
AND CHM 1210L	General Chemistry Laboratory I	1.00	

2
